The Unverferth Drill Fill fills seedboxes in approximately 10 minutes, so you spend more time drilling and less time filling. Conveniently placed controls, the spring-lift-assisted auger and a 10-foot telescoping downspout allow for one-person operation from either the ground or the drill platform.

Drill Fill augers can be mounted to most drills and can be fitted with your choice of brush-tip or cupped steel flighting.

Drill performance can be optimized by adding the single Rolling Harrow® basket attachment which levels and firms the soil for improved seed-to-soil contact and enhanced germination. It also chops and evenly distributes residue for more even emergence.

So save time and your back. See your Unverferth dealer today, give us a call or check out our Web site.
