V-SERIES SINGLE-AUGER GRAIN CARTS

GRAIN HANDLING

The **Brent® V-Series** grain cart features a single-auger design that positions the downspout forward, upward and outward, so it is clearly visible from the side window of your tractor with ample reach and height clearance for convenient unloading. The standard four-way downspout ensures maximum versatility with limited tractor movement while unloading. Choose from sizes ranging from 1,500 to 750 bushels and innovative undercarriage options, such as high-flotation single tires or tracks.
