UNMATCHED SEED-PLANTING EFFICIENCY

Time and convenience are two of your most valuable commodities at planting. That's why more growers are discovering the time and cost savings of delivering bulk box seed to the field and planter with the SeedVeyor® model 102 bulk box tender. The conveyor unloading system provides fast and gentle unloading which makes the bulk box tender the perfect fit for any operation.

- The 8" cupped and cleated belt inside the 6" steel tube gently carries seed at speeds up to 12 bushels per minute
- Brush and patented side seals on the conveyor inlet minimize seed damage by preventing seed from back-feeding
- 2 seed box carrying capacity totalling approximately 100 seed units
- Winch-controlled height adjustment for unloading ease
- Hinged/removable bottom door on the conveyor for complete cleanout
- Protective lids cover the unloading chutes when not in use to keep out moisture and debris

See how you can increase productivity this planting season without breaking the bank by seeing your nearest Killbros dealer or visiting **killbrosequip.com** today!
