

THE TRUSTED NAME
— IN THE FIELD —

PARKER 42-SERIES

Single-Auger Grain Carts

LIGHTNING FAST UNLOADING & GREATER REACH

Parker has been a trusted name in grain handling for more than 50 years. The latest generation of single, corner-auger grain carts continue to increase harvest ease with larger diameter augers for fast unloading speeds and a longer upper auger for greater side reach and height. These features allow you to easily reach the tallest trucks and get back to the combine faster.

- Tank capacities range from 630 to 1300 bushels and a steep-sloped tank design for greater clean out.
- Unloading speeds of 500 bushels per minute on models 1342, 1142 and 1042, 450 bushels per minute on models 842 and 742 and 400 bushels per minute on model 642 to get you back to the combine faster.
- Two-way hydraulically controlled downspout for easily topping off trucks. An optional 4-way downspout can be added for an additional 2' of in-and-out control.
- Choose from high-flotation single wheels and tires, 36" wide tracks or the patented 42" Equalizer® track depending on model.

MAXIMIZE YOUR HARVEST POTENTIAL.
