

SPRAY MORE. FILL LESS.

The Top Air Premier lineup of pull-type sprayers feature tank capacities up to 2400 gallons and boom widths up to 132'. This equates to more acres sprayed per day with less time filling and increased productivity. Plus, by utilizing existing horsepower on the farm, you won't break the bank when it's time to spray! Customize your sprayer to fit your needs by adding a run-dry high-pressure pump (std. on TA2400), auto-boom height control or steerable hitch. *When you're ready to spray more and fill less, visit topairequip.com or your nearest dealer today.*
