

RIP COMPACTION CONDITION YOUR SEEDBED

RIPPER-STRIPPER®
TILLAGE TOOL

The **Ripper-Stripper®** tillage tool is the most customizable strip-till machine available. Choose from a lead coupler that clears a path for the shank or a cover crop roller with an 11" diameter drum that crimps and deflects residue away from the row. The deep-till shanks with shark-fin points and wear bars rip through compaction from 9" to 18" deep. Plus, you can choose from the widest variety of attachments to complete the tillage pass.

RIPPER BEDDER
TILLAGE TOOL

The **Ripper-Bedder** tillage tool is ideal for bedded crops such as peanuts and cotton. The deep-till shanks with shark-fin points and wear bars rip through compaction from 9" to 18" deep. Choose from a disc bedder or economical lister attachment to create the ideal seedbed. Add an optional bed shaper for crisp, level seedbeds.
