

ANHYDROUS APPLICATORS *BUILT FARMER TOUGH*

RENEGADE
MODEL 3500

RENEGADETM ANHYDROUS AMMONIA APPLICATORS

The **Unverferth Renegade NH3 applicator** is built farmer tough for timely application of high-value anhydrous ammonia. Toolbar sizes range from 25 rows down to 11 rows with 30" row spacing, and standard wing flex ensures consistent application. The heavy-duty row unit features a 20" lead coulters with 6-bolt hub, 1,500 pounds of downforce, 2" edge-bent shank and CoverMax closing coulters with independent vertical travel for consistent placement. A standard Raven stainless steel Vortex cooler and ISOBUS rate controller accurately power the NH3 distribution system.

HIGH-QUALITY APPLICATION FOR HIGH-QUALITY FARM OPERATIONS.
