

THE EVOLUTION OF PRODUCTIVITY

60-SERIES
MODEL 3760XL

When every hour in the planting window counts, the **60-Series Unverferth Seed Runner®** seed tender is engineered to keep you moving—smarter, smoother, and faster than ever before. With advanced technology like a CAN bus communication system, an electronically controlled Honda® engine, and the new standard 5-function wireless remote, the 60-Series delivers precision control and effortless operation in the field.

Additional new standard features include an auto-tension conveyor system, hopper access doors, engine auto-throttle, LED work lights and a new DG3520 scale package on DXL and XL models. For those who demand performance with a presence, the all-new limited Midnight Edition Seed Runner with midnight metallic gray paint scheme, aluminum wheels and premium standard features ensure fully loaded performance.

This isn't just the next generation of seed tenders—it's the evolution of productivity.
