A NEW REVELATION IN COVER CROP SEEDING

COVER CROP SEEDER FOR THE ROLLING HARROW®!

- Pull behind a lead tillage tool or by itself for faster planting of value-adding cover crops.
- Works the seed into the soil for a more consistent stand than traditional broadcasting.
- 40.5 cubic foot hopper capacity, standard roll-tarp, side-viewing windows and indicator lights.
- Hydraulic rate control requires 22 gpm flow and features in-cab shut off.
- Powered by a reliable air-delivery system that sends seed to the conically shaped deflectors for even seed distribution.
